

Bar Graph, Pie Chart, Pivot Table & Conditional Formatting

BI Publisher – Step-by-Step Guide

1. Bar Graph Based on SUM(SAL) and DEPTNO

Step 1: Build the Bar Chart

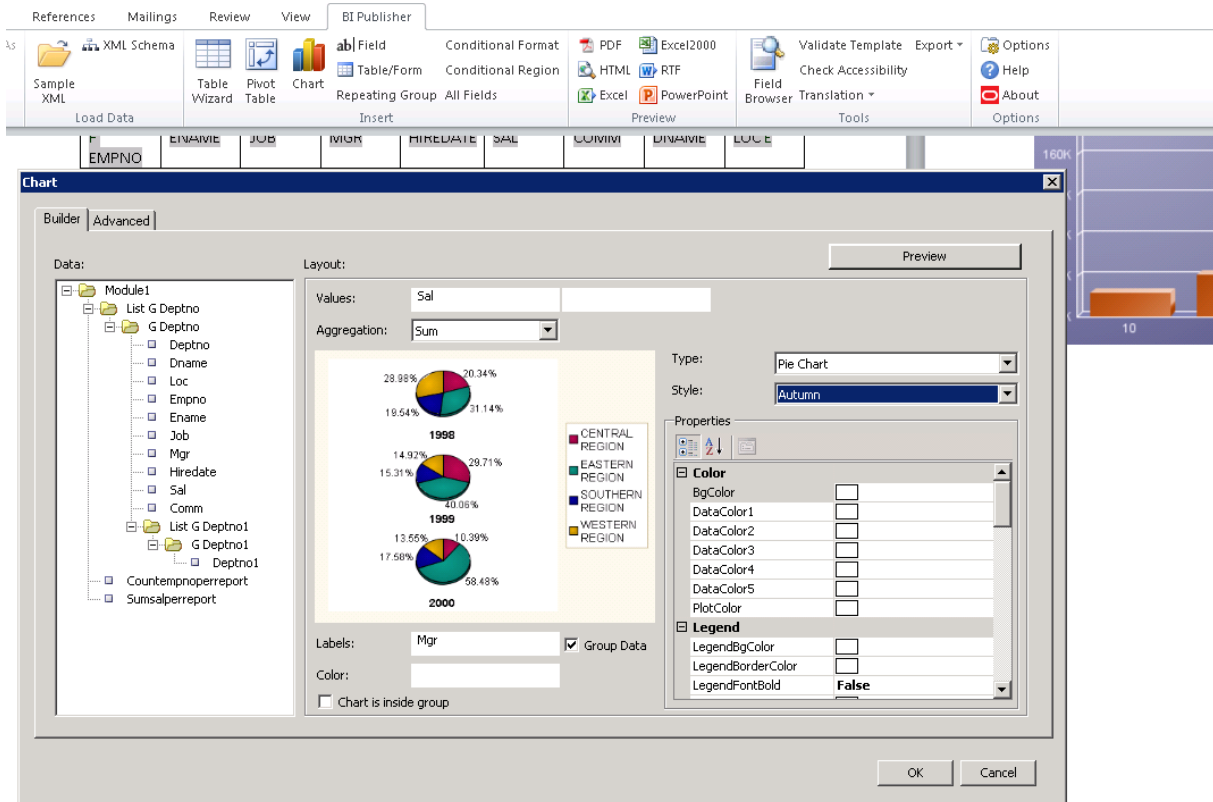

Open Chart from the BI Publisher ribbon. Under Data, select Sal for Values with Sum as the Aggregation, and Deptno for Labels. Set the Type to Bar Graph - Vertical and choose a style. Click Preview to see the chart, then click OK to insert it into the template.

2. Pie Chart Based on SUM(SAL) and MGR

Step 2: Build the Pie Chart

Open Chart again from the BI Publisher ribbon. Under Data, select Sal for Values with Sum as the Aggregation, and Mgr for Labels. Set the Type to Pie Chart and choose a style. Click Preview to see the chart, then click OK to insert it into the template.

Step 3: Review the Charts in the Template

After inserting both charts, the Word template shows the master-detail table together with the bar chart (based on Sal per department) and the pie chart (based on Sal per manager).

group G_EMPNO by DEPTNO1

DEPTNO1

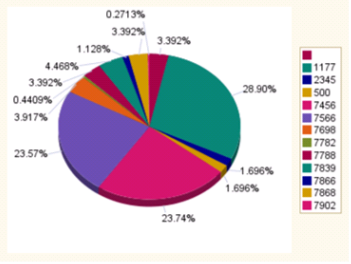

Empno	Ename	Job	Mgr	Hiredate	Sal	Comm	Dname	Loc	
F	EMPNO	ENAME	JOB	MGR	HIREDATE	SAL	COMM	DNAME	LOC

end G_EMPNO by DEPTNO1

BAR CHART-BASED ON SAL FOR EACH DEPT

PIE CHART BASED ON SUM(SAL) AND MGR

PIVOT TABLE BASED ON COUNT(EMPLOYEES) UNDER DEPTNO

3. Pivot Table Based on COUNT(Employees) Under Each MGR for Every DEPTNO

Step 4: Configure the Pivot Table Layout

Open Pivot Table from the BI Publisher ribbon. Place Deptno in the row area and Mgr in the column area, then drag Ename into the values area and set its Aggregation to Count.

OK Cancel

Step 5: Preview the Pivot Table Layout

Click Preview to see the pivot table with department numbers as rows and manager numbers as columns, showing the count of employees for each combination.

Step 6: Review the Field Codes in the Template

Once inserted, the template shows the pivot table field codes before the report is run with real data.

PIVOT TABLE BASED ON COUNT(EMPLOYEES) UNDER EACH MGR FOR EVERY DEPTNO

CH	G MGRE	Total
G DEPTNO	G 999E	999E
	G 999E	999

Step 7: Review the Completed Pivot Table

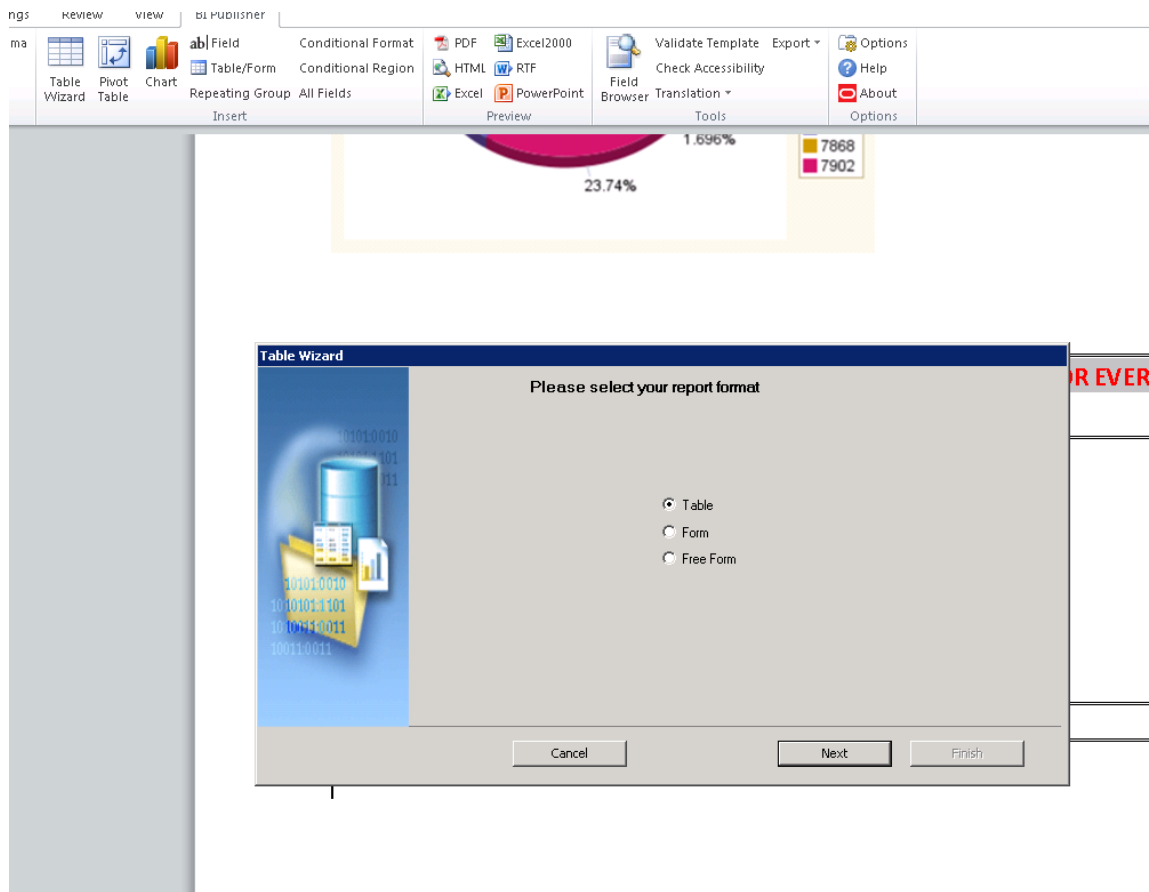

The finished pivot table shows the count of employees under each manager for every department, with row and column totals.

PIVOT TABLE - BASED ON COUNT (EMPLOYEES, UNDER EACH MGR FOR EVERY DEPT)								
		1177	2345	500	7456	7566	7698	
10	38	0	0	0	0	2	0	
20	8	0	0	0	0	4	0	
30	3	1	1	1	1	6	6	
	49	1	1	1	1	12	6	

4. Conditional Formatting on the Master-Detail Table

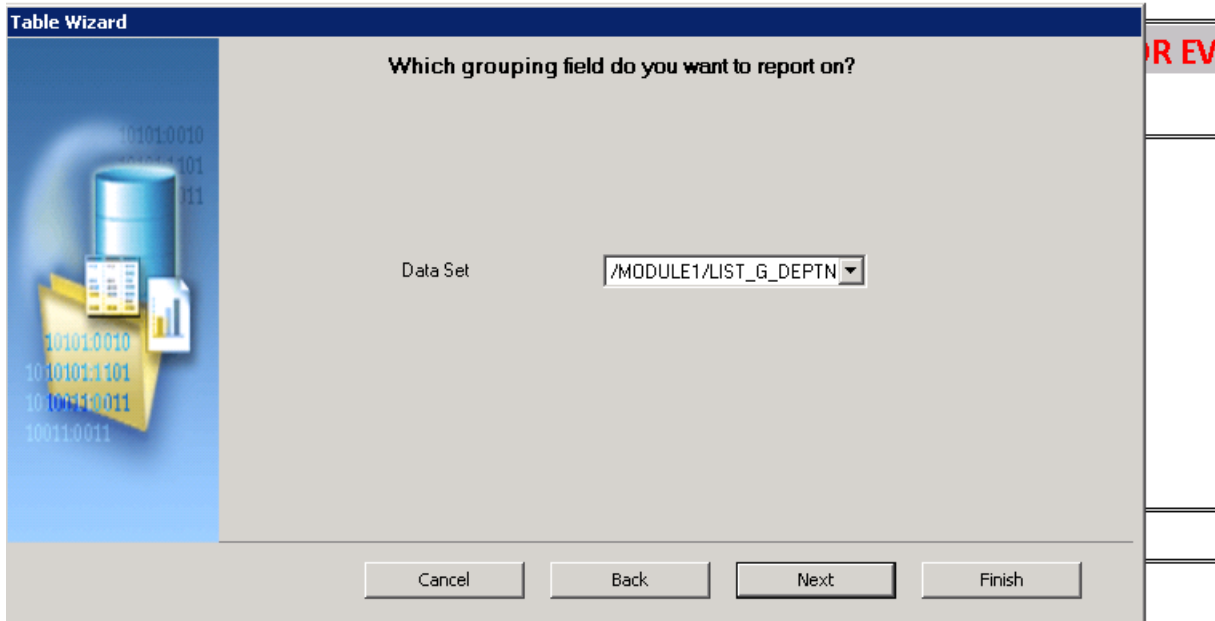

Step 8: Select the Table Format

After clicking Finish to create a new table from the Table Wizard, choose Table as the report format.

Step 9: Choose the Grouping Data Set

Select the data set the table will be based on.

The screenshot shows the 'Table Wizard' dialog box at Step 9. The title bar reads 'Table Wizard'. The main heading is 'Which grouping field do you want to report on?'. On the left is a decorative graphic with binary code and a folder icon. The 'Data Set' label is followed by a dropdown menu showing '/MODULE1/LIST_G_DEPTN'. At the bottom are four buttons: 'Cancel', 'Back', 'Next', and 'Finish'.

Table Wizard

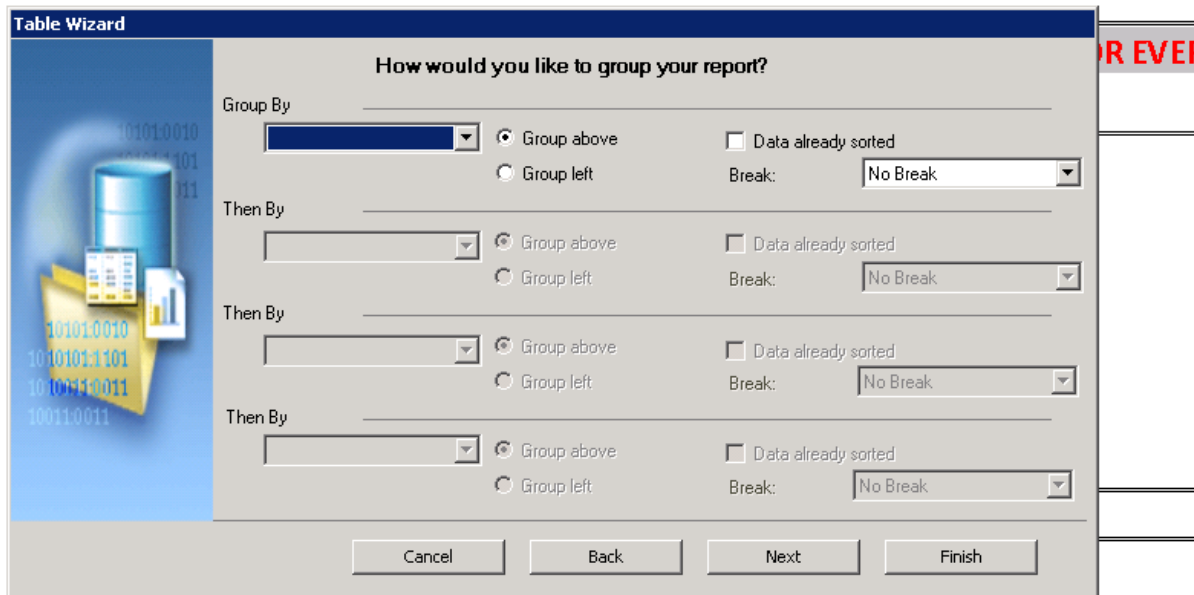

Which grouping field do you want to report on?

Data Set: /MODULE1/LIST_G_DEPTN

Buttons: Cancel, Back, Next, Finish

Step 10: Leave the Group By Field Blank

In the grouping step, leave the Group By field blank so the table is created without grouping.

The screenshot shows the 'Table Wizard' dialog box at Step 10. The title bar reads 'Table Wizard'. The main heading is 'How would you like to group your report?'. On the left is the same decorative graphic as in Step 9. The 'Group By' section has a dropdown menu (currently blank) and two radio buttons: 'Group above' (selected) and 'Group left'. To the right is a checkbox 'Data already sorted' (unchecked) and a 'Break:' dropdown menu (set to 'No Break'). This same set of controls is repeated for 'Then By' three times. At the bottom are four buttons: 'Cancel', 'Back', 'Next', and 'Finish'.

Table Wizard

How would you like to group your report?

Group By: [Blank] ☒ Group above ☐ Data already sorted Break: No Break

Then By: [Blank] ☒ Group above ☐ Data already sorted Break: No Break

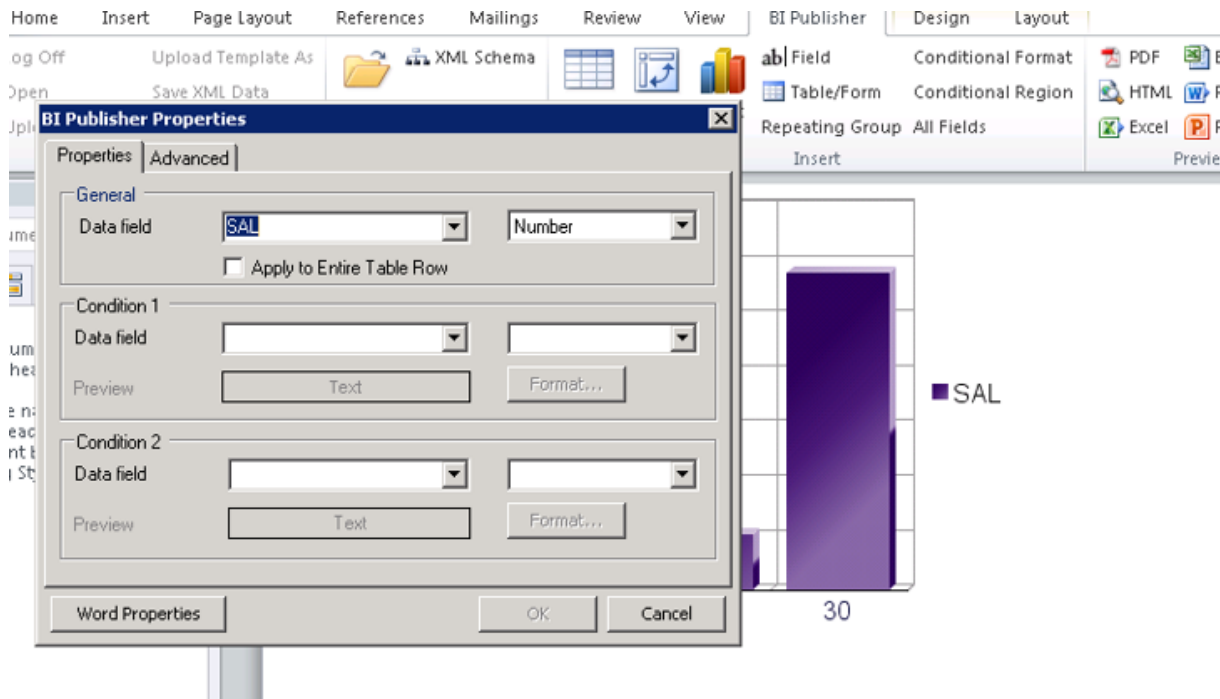

Then By: [Blank] ☒ Group above ☐ Data already sorted Break: No Break

Then By: [Blank] ☒ Group above ☐ Data already sorted Break: No Break

Buttons: Cancel, Back, Next, Finish

Step 11: Apply Conditional Formatting

Select the table, then choose Conditional Format from the BI Publisher ribbon. Set the Data field to Sal, then set Condition 1 for values less than 5000 and Condition 2 for values more than 10000, each with its own format.

Step 12: Review the Conditional Formatting Result

The report output shows rows with Sal less than 5000 highlighted in red and rows with Sal more than 10000 highlighted in green, based on the conditions set.
