

Create a Parameterized Report in Oracle EBS

Step-by-step guide for building a parameterized report (KHADIJAPARREPORT / KHADIJAPARAMETERREPORT) in Oracle Reports Builder and registering it in Oracle EBS, with the supplied screenshots placed next to the steps they illustrate.

Steps with a related screenshot (quick index):

Step	What the screenshot shows
3	Query Builder — EMP table selected
6	Report output preview (EMP Details Report)
13	Concurrent Programs form — program & executable
15	Concurrent Program Parameters — DNO parameter
28	Final output filtered by DEPTNO = 30

PART 1 — Create the Report in Oracle Reports Builder

1. Open Reports Builder

Open Oracle Reports Builder, create a new Report Module, and select the required report style, such as Tabular.

2. Connect to the Database

Use:

APPS/apps@EBSDB

3. Create the Query [\[Screenshot below\]](#)

Open Data Model, click Query Builder, select the EMP table, and select the required columns. Or enter the query directly:

```
SELECT *  
FROM EMP  
WHERE DEPTNO = :DNO;
```

Here, **:DNO** is the Bind Parameter.

■ SCREENSHOT FOR STEP 3

Query Builder: EMP table selected in Reports Builder

4. Create the Parameter

When you create the query using:

```
SELECT * FROM EMP WHERE DEPTNO = :DNO;
```

Reports Builder automatically creates the parameter **DNO**.

5. Save the Report

Save the report as:

```
KHADIJAPARREPORT.rdf
```

The .rdf file is the Report Binary Format according to the training notes.

6. Compile the Report [\[Screenshot below\]](#)

Compile the report before moving it to the EBS server. Running/previewing it at this stage produces the raw report output shown below.

Report output preview (EMP Details Report)

PART 2 — Move the Report to EBS Server

7. Open WinSCP

Connect to the EBS server.

8. Move the .rdf File

Move:

KHADIJAPARREPORT.rdf

to:

/u01/install/VISION/fs1/EBSapps/appl/fnd/12.0.0/reports/US

PART 3 — Create the Executable in EBS

9. Login to Oracle EBS

Login to EBS and switch to:

Application Developer

10. Navigate to Executable

Go to:

Application Developer
→ Concurrent
→ Executable

11. Create the Executable

Enter:

Name: KHADIJAPARREPORT
Short Name: KHADIJAPARREPORT

Set:

Execution Method: Oracle Reports

Set the execution file name to the report name:

KHADIJAPARREPORT

Then Save.

PART 4 — Create the Concurrent Program

12. Navigate to Concurrent Program

Go to:

Application Developer
→ Concurrent
→ Program

13. Enter Program Details [Screenshot below]

Enter:

Program: KHADIJAPARREPORT
Short Name: KHADIJAPARREPORT
Application: Application Object Library

For Executable, select KHADIJAPARREPORT. Set output format as HTML, then click Save.

■ SCREENSHOT FOR STEP 13

Concurrent Programs form: program and executable registered (Method: Oracle Reports)

PART 5 — Add the Parameter

14. Open Parameters

Inside the Concurrent Program, click Parameters.

15. Create Parameter DNO [Screenshot below]

Enter:

Name: DNO

For Value Set, select NUM, then press TAB, and select NUMBER_15. Set the token to DNO, then Save.

The important relationship is:

Report Query:

```
SELECT * FROM EMP WHERE DEPTNO = :DNO
```

Concurrent Program Parameter:

DNO

Token:

DNO

SCREENSHOT FOR STEP 15

The screenshot displays the 'Concurrent Program Parameters' window in Oracle. The main window shows the 'Program' as 'KHADUAPARAMETERREPORT' and 'Application' as 'Application Object Library'. A 'Concurrent Program Parameters' dialog box is open, showing a table with one parameter: 'DNO' (Sequence 1, Enabled). Below the table, the 'Validation' section shows 'Value Set' as 'NUMBER_15' and 'Default Type' as 'Required'. The 'Display' section shows 'Display Size' as 15, 'Description Size' as 50, 'Concatenated Description Size' as 25, and 'Prompt' as 'DNO'. The 'Token' is set to 'DNO'.

Concurrent Program Parameters: DNO parameter with Value Set NUMBER_15 and Token DNO

PART 6 — Add the Program to Request Group

16. Switch to System Administrator

Switch responsibility to System Administrator.

17. Navigate to Request Group

Go to:

Security
→ Responsibility
→ Request

18. Query the Existing Request Group

Query the required existing Request Group.

19. Add the Program

Under the programs section, set Type: Program and add KHADIJAPARREPORT, then Save.

PART 7 — Run the Report

20. Switch to Your Responsibility

Switch to the responsibility that has access to the Request Group.

21. Open Requests

Navigate to: View → Requests.

22. Submit a New Request

Click Submit a New Request, select Single Request, then click OK.

23. Select the Report

Click the LOV and select KHADIJAPARREPORT.

24. Enter the Parameter

The parameter field should appear as DNO. Enter, for example, 30, so the report executes:

```
SELECT * FROM EMP WHERE DEPTNO = 30;
```

25. Submit

Click Submit. When asked "Submit another request?", select No.

PART 8 — Check the Report

26. Find the Request

Click Find.

27. Refresh the Request

Click Refresh Data until the status becomes Completed.

28. View the Report [\[Screenshot below\]](#)

Click View Output. You should see the EMP records filtered according to the DNO value you entered.
