

1 Build the Form

1. Develop the form using **Oracle Forms Builder**.
2. Save as `.fmb` and compile to `.fmx`.

2 Move the .fmx Files to the EBS Server

Copy the compiled files to:

```
/u01/install/VISION/fs1/EBSapps/appl/fnd/12.0.0/forms/US
```

- `KHADIJAEMP.fmx`
- `KHADIJAMasterDetailForm.fmx`

3 Log in to EBS

Login: `KHADIJA / welcome`

4 Register Form, Function & Menu (Application Developer)

1. `Application > Form` — register the form.
2. `Application > Function` — register a function for each form:

The screenshot shows the "Form Functions" window in Oracle Applications. The window has a menu bar (File, Edit, View, Folder, Tools, Window, Help) and a toolbar with various icons. Below the toolbar are tabs for Description, Properties, Form (selected), Web HTML, Web Host, and Region. A scrollable table displays function information:

Function	Form	Application	Parameters
KHADIJAEMP	KHADIJAEMP	Application Object Libra	
KHADJAMASTERDETAI	khadjaMasterDetailForm	Application Object Libra	

An "Open" button is visible at the bottom right of the interface.

3. Application > Menu — create `KHADIJAFORM_MENU` and attach the functions:

[illegible]

5 Create a New Responsibility

1. Create a user-defined responsibility and attach the menu to it:

System Administrator > Security > Responsibility > Define Name: KHADIJA_FORMS_RESP , Menu: KHADIJAFORM_MENU

2. Assign the new responsibility to one or more users.

6 Navigate and Verify

1. Log in and open the responsibility KHADIJA_FORMS_RESP .
2. Navigate: Menu KHADIJAFORM_MENU → Function KHADIJAEMP .

The custom form now appears under the new responsibility
